KING CHAUPAT

(Comedy Drama)

Part 1

Scene I: A King's Court. The court awaits the arrival of the King. Two guards are standing front right of the stage.

First: (To the second guard)
Guard Be alert, the King is about to arrive.

Second: Who wants to be alert? Life seems like long sleep
Guard in this land. I am at ease all day, though I am a guard.

First: How boring! I wonder if some interesting drama will
Guard unfold at the court today. It would enliven the atmosphere.

Second: I would be equally happy if there was none
Guard (Enter the disciple looking around)

First: Halt! You are stranger. Give your identity.
Guard

Disciple: You are right. I am a visitor here. a disciple of the wise sage from the Ghangar forest which lies to

THE SECRET TO LIFE

Author, International Speaker and
Spiritual Messenger

There is no blackboard in the sky on which God has written your purpose, your mission in life. There's no blackboard in the sky that says, "Neale Donald Walsch Handsome guy who lived in the first part of the twenty-first century, who..." And then there's a blank. And all I have to do to really understand what I'm doing here, why I'm here, is to find that blackboard and find out God really has in mind for me. But the blackboard doesn't exist.

So your purpose is what you say it is. Your mission is the mission you give yourself. Your life will be what you create it as and no one will stand in judgment of it, now or ever.

You get to fill the blackboard of your life with whatever you want. If you have filled it with baggage from the past, wipe it clean. Erase everything from the past that does not serve you, and be grateful it brought you to this place now, and to a new beginning. You have a clean slate, and you can start over—right here, right now. Find your joy and live it!

COMPUTER

A computer is a machine that can be instructed to carry out sequences of arithmetic or logical operations automatically via computer programming. Modern computers have the ability to follow generalized sets of operations, called programs. These programs enable computers to perform an extremely wide range of tasks. A "complete" computer including the hardware, the operating system, and peripheral equipment required and used for "full" operation can be referred to as a computer system. This term may as well be used for a group of computers that are connected and work together, in particular a computer network or computer cluster.

Computers are used as control systems for a wide variety of industrial and consumer devices. This includes simple special purpose devices like microwave ovens and remote controls, factory devices such as industrial robots and computer-aided design, and also general purpose devices such as smartphones. The Internet is run on computers and it connects hundreds of millions of other computers and their users.
